

# Pre-Launch QA Checklist

The same 25-point checklist SignalCrest Systems runs before every client go-live.

## Functionality (7 checks)

- All internal links resolve correctly
- Contact forms submit and deliver
- Navigation works on every page
- Images load with proper alt text
- Buttons and CTAs link to correct destinations
- 404 page displays for broken URLs
- Cross-browser testing (Chrome, Firefox, Safari, Edge)

## Performance (6 checks)

- Page load under 3 seconds on mobile
- Images optimized and properly sized
- CSS and JS minified
- No render-blocking resources
- Lazy loading for below-fold images
- Core Web Vitals within Google thresholds

## Security (5 checks)

- HTTPS enforced on all pages
- Security headers configured
- No mixed content warnings
- Form inputs sanitized against injection
- Dependencies checked for known vulnerabilities

## SEO (4 checks)

- Unique title tags and meta descriptions
- Proper heading hierarchy (H1 to H6)
- Open Graph and social sharing tags
- XML sitemap and robots.txt configured

## Mobile & UX (3 checks)

- Responsive layout at all breakpoints
- Touch targets meet minimum size (44px)
- Readable typography without zooming
